

Deterministic PDF Rendering Fixtures for Go Libraries

GoPDFKit Example Authors

Abstract

This fixture demonstrates title blocks, abstract text, two-column body copy, figures, and references inside a compact academic-style layout.

1. Section

Generated PDFs are useful as regression fixtures because they exercise layout, metadata, fonts, tables, and vector drawing in one reproducible artifact. Generated PDFs are useful as regression fixtures because they exercise layout, metadata, fonts, tables, and vector drawing in one reproducible artifact. Generated PDFs are useful as regression fixtures because they exercise layout, metadata, fonts, tables, and vector drawing in one reproducible artifact. Generated PDFs are useful as regression fixtures because they exercise layout, metadata, fonts, tables, and vector drawing in one reproducible artifact. Generated PDFs are useful as regression fixtures because they exercise layout, metadata, fonts, tables, and vector drawing in one reproducible artifact.
